

Summary of Submissions for the Performers' Protection Amendment Bill [B24-2016]

1. Introduction

The Performers' Protection Amendment Bill (PPAB) intends to address and resolve the following but not limited to:

- The non-payment of royalties for audio-visual performers;
- The lack of formalisation of the creative industry and the related abuse;
- To address digitisation;
- The incidence of piracy; and
- The moral and economic rights of performers related to audio-visual fixations.

The Performers' Protection Amendment Bill focuses on the:

- Definition of certain words and expressions;
- The protection of performers' moral and economic rights;
- Written agreements where rights of performers are involved;
- The protection of rights of producers of phonograms (sound recordings); and
- Prohibition of conduct in respect of technological protection measures and copyright management information.

The Performers' Protection Amendment Bill incorporates the following International Treaties, which will be ratified:

- The WIPO Performances and Phonograms Treaty (WPPT)- deals with the rights of two kinds of beneficiaries, particularly in the digital environment: (i) performers (actors, singers, musicians, etc.); and (ii) producers of phonograms (persons or legal entities that take the initiative and have the responsibility for the fixation of sounds); and
- The Beijing Treaty on Audio-visual Performances (BTAP) deals with the intellectual property rights of performers in audio-visual performances.

The Beijing Treaty on Audio-visual Performances:

The Beijing Treaty modernizes and provides updates for the digital era for the protection for singers, musicians, dancers and actors in audiovisual performances contained in the Rome Convention for the Protection of Performers, Producers of Phonograms and Broadcasting Organizations (1961).

The Beijing Treaty encompasses the performances of actors in different media, such as film and television, and also includes musicians when their musical performances are recorded in a DVD or any other audiovisual platform. The Beijing Treaty grants performers economic rights in fixed and unfixed performances, as well as certain moral rights.

Moral Right:

The right to claim to be identified as the performer; and the right to object to any distortion, mutilation or other modification that would be prejudicial to the performer's reputation, taking into account the nature of the audiovisual fixations.

Four Economic Rights:

Right of reproduction is the right to authorize direct or indirect reproduction of the performance fixed in an audiovisual fixation in any manner or form.

Right of distribution is the right to authorize the making available to the public of the original and copies of the performance fixed in an audiovisual fixation through sale or other transfer of ownership.

Right of rental is the right to authorize the commercial rental to the public of the original and copies of the performance fixed in an audiovisual fixation.

Right of making available is the right to authorize the making available to the public, by wire or wireless means, of any performance fixed in an audiovisual fixation, in such a way that members of the public may access the fixed performance from a place and at a time individually chosen by them. This right covers, in particular, on-demand, interactive making available through the Internet.

Socio Economic Impact Assessment Report (SEIAS) 2017 and the Regulatory Impact Assessment (RIA) 2014:

An independent assessment was undertaken in 2014 after the Draft IP Policy was published for public comments in September 2013. The assessment was focused on a selection of policy proposals in the Draft IP Policy, identifying the critical policy themes as representative of the core policy objectives and significant change in the IP regulatory landscape. One of the critical policy themes the RIA assessed was the amendment of various legislation to implement the contents of international treaties; in the domains of Copyright, Designs and Trade Marks.

The CAB SEIAS Report was certified on 29 May 2017 by the Department of Monitoring and Evaluation (DPME). This was after it was published by the PC for public comments on the 7 May 2017. Hence, the PC has made it available on request. The SEIAS does meet the guidelines of the DPME.

Information on the SEIAS to be provided by the appropriate unit as many of the submissions deals with a SEIAS not being done on the PPAB and the BTAP.

2. Summary of core issues (List not exhaustive)

- “Communication to the public of a performance” should not be limited to audiovisual fixation only but should apply to phonograms as well.
- “Performance” - a definition of performance should be included in the PPAB.
- Reversion – the PPAB is not clear on what happens to performers rights after the lapse of the 25-year period.
- IPLAA - Drafting of the Bill denotes that IPLAA amendments will no longer be implemented.
- BTAP – the incorporation of the provisions of the BTAP is premature as no cost-benefit analysis has been done and the BTAP is not in force yet.
- Treaties - a definitive statement from the South African Government on its intention to accede to treaties is necessary.
- Collective Bargaining – The Bill does not make provision for collective bargaining, only individually negotiated contracts.
- “Broadcast” the definition of broadcast should be aligned in both the CAB and the PPAB.

- The PPAB reads in such a way that it seems that performers only entitled to a moral right after the transfer of rights as contemplated in section 3A and 3B of the PPAB.
- The prescription of terms and conditions of contractual agreements directly affects contractual freedom.
- The Ministry of Arts and Culture, Trade and Industry and Heritage Council should develop an unwavering interest in making sure that the discrimination against actors of certain ethnic groups ends. A call for the promotion of social cohesion and inter-culturalism has been made.
- The SEAIS does not reflect that proper research on policies and procedures underlying the PPAB was done.
- The assumption that performers must participate in all commercial negotiations between copyright owners and users is directly contrary to the way in which the recording industry works in practice.
- The agreement procedure prescribed in sections 3A and 3B may not be easy to conclude and will result in delays.
- Exemptions contemplated in the PPAB are too broad and should be confined to certain kinds of performances. A general exceptions clause should be inserted into PPAB to ensure a balanced performers" pro-regime.
- Clarity sought on what constitute a "fair equitable remuneration" with regard to a royalty. This will result in delays in payments as exploitation of performances is dependent on agreement between parties.
- The Minister does not have to determine what is equitable remuneration for the direct or indirect use of the phonogram since the Copyright Tribunal is already in place to adjudicate matters.
- Distribution of royalties should be dealt with at the level of Collecting Societies. This would minimise administration costs and in addition the activity will be subject to the regulatory supervision of the Registrar of Copyright to ensure prevention of abuses.
- There should be payment for repeat fees (rebroadcasts) and commercial exploitation as this is currently not happening except for a few isolated cases.
- Notice procedure proposed in section 5 is cumbersome and difficult.
- Transitional period should be provided for in the PPAB.
- Contracts by broadcasters are collusive and unfair and should be done away with.

4. Specific comments/Questions Raised by Stakeholders

1	Prof Sadulla Karjiker- Anton Mostert Chair of Intellectual Property Stellenbosch	<ul style="list-style-type: none"> • Is the intention that the IPLAA amendments will no longer be implemented? • There are two subcategories of fixation, namely, a phonogram and audiovisual fixation. Wording for the definition of „Fixation“ has been suggested. 	<p>the dti will be implementing IPLAA, 2013.</p> <p>Fixation as defined by IPLAA, 2013 covers both phonograms and Audiovisual works (no subcategories in this regard).</p>

		<ul style="list-style-type: none"> • It is not clear if a distinction between aural recordings and audiovisual recordings is at all necessary. • Careful consideration should be given to whether certain provisions are intended to apply to fixations or specifically to phonograms or audiovisual fixation. • “Communication to the public of a performance” should not be limited to audiovisual fixation only but should apply to phonograms as well. • A definition of performance should be included in the Bill. • The proposed new section 3(3) unclear. • What happens to performers rights after 25yrs? • The term producer is undefined- is this the same as the author? • The proposed section 8(2)(f) is inappropriate, and should be deleted 	<p>The Copyright regime has always differentiated between audio recordings and audiovisual recordings (the other one including sounds only while the other including both sounds and images).</p> <p>Use of fixation will depend on the right applicable to the provision.</p> <p>Comment is misplaced simply because communication to the public is provided for performances in both sound recordings and audiovisual works. Applies to both. Fixation is a fixation.</p> <p>Performance is defined in the IPLAA, 2013 and it will be applicable.</p> <p>3(3) will be clarified.</p> <p>After 25 years the performer’s rights will be renegotiated.</p> <p>The term producer needs to be considered in the context of sound recordings and audio visual works to which they play different roles. It may be possible to define the term producer for clarification.</p> <p>Noted.</p>
2	Dramatic, Artistic and Literary Rights Organisation	<ul style="list-style-type: none"> • Agrees and Supports the submission 	Noted.

	(DALRO)	of PASA.	
3	Hans Strydom	<ul style="list-style-type: none"> • Of the view that the Act which was drafted before television existed was aimed at musicians only and not actors. Would prefer a separate Act for Musicians and a separate Act for Actors. • The SABC and Etv have made provision in their standard contracts with actors and writers, for a “repeat fee” to be paid in the case of a programme being repeat broadcasted and a “commercial exploitation fee” if the programme is commercially exploited. We refer to these contractual rights as “economical rights” in contrast with “royalty rights”. • Mnet and Kyknet contracts do not make provision for such economical rights. • The distinction between copyright and non-copyright holders, it is important to retain the phrase “royalty or other equitable remuneration” in clauses of the Bill 	<p>Performer Protection deals with related rights linked to copyright. The intention has always been to protect all artists. In the past international treaties such as WPPT and Rome Convention covered performances in sound recordings only. The BTAP has now created the opportunity for audio visual performers to receive adequate protection. It must be noted that stage always existed. Now with digital means different forms of fixation need to be protected.</p> <p>the dti has investigated this situation and majority of performers are not receiving any payments and contracts are being used to exploit the situation of the actor in the absence of legislative reform allowing for economic rights.</p> <p>Noted</p> <p>Distinction is not necessary.</p>

		<p>when referring to compensation payable to performers for the usage of their images. This is to also make provision for non-copyright.</p> <ul style="list-style-type: none"> • The Bill also provides for the establishment of so-called “collecting societies”. It is suggested that membership of these societies be on a voluntary basis as not all actors are keen to join such organisations, especially in the light of what happened in the music industry. • Actors should be viewed as independent contractors and not as employees. • It is nevertheless absolutely necessary for legislation to ensure that actors are compensated for the continued usage of their images, even after their deaths. 	<p>Yes, joining Collecting Societies is voluntary, but Collecting Societies must be regulated. Collective management is a mechanism which allows for management of rights.</p> <p>It depends on the relationship. Full-time employment possible and independent contracting is possible. The Bill does not regulate this relationship.</p> <p>Agreed. Lifespan should be 50 years after death of an actor.</p>
4	The International Federation of Film Producers Associations (FIAPF)	<ul style="list-style-type: none"> • Submits that law crossing the boundary between a legislative framework and agreements between producers / AV performers related to performer remuneration should be avoided. This includes dictating how revenue from commercial exploitation should be shared. • Rights transfer details should be left to collective bargaining agreements due to the financial and distribution complexities involved in audio visual 	<p>The law wants to balance power relations of parties who own rights that can be commercially exploited. Minimum contractual terms need to be prescribed. Self-regulation should not be left to chance in the rampant economic exploitation.</p> <p>Like in the labour environment, although collective bargaining is allowed, the Labour Relations Act (LRA) makes a deliberate intrusion in order to curb</p>

		<p>works and the huge amounts involved in the cost of making audio visual works compared to other forms of productions such as books.</p> <ul style="list-style-type: none"> • Concern with section 3A is that agreements will not be left to industry collective bargaining, but will be the result of direct intervention from a governmental entity. • Recommends allowing stakeholders to construct agreements bilaterally as being more effective. • The disposition in section 3A seems overly prescriptive in the context of film or TV production in terms of being royalty based. As a solution, suggests the use of the UK system based on residuals as being more realistic. • Royalty based approach in PPAB will be a disincentive for investment into SA productions. • Suggests the use of the reference “producer” instead of “copyright owner” in the context of the transfer of rights in section 3A. • Contradictory language used in proposed section 3A and section 5 will result in challenges when it comes to deploying a contractual 	<p>rampant exploitation of the workers.</p> <p>Same analogy as in the LRA. The intention is for minimum standard of protection to be introduced to ensure fairness in the contracts.</p> <p>Status quo of rampant exploitation can no longer be left undisturbed. Industry has called for intervention and the legislation is being aligned to international law as well.</p> <p>PC should look at different models, and make an appropriate decision.</p> <p>Noted.</p> <p>Noted.</p>

Submits that the entire section be reconsidered. • The PABB should contain clearly laid out provisions regarding exceptions and limitations to the rights therein. • The current catch-all references in section 8(2)(f) and 5(a) to the exceptions and limitations in the Copyright Act are insufficient. • The PPAB should contain its own bespoke provisions on the legal protection of TPM's and rights information. • Concerned with unwaivable right to remuneration in proposed section 3A. • Does not support remuneration mechanism being determined by Government. • Proposed section 5 contradicts BTAP rights in proposed section 3(4) by reducing them to a prohibition. • Proposed the use of Collective 	<p>Noted.</p> <p>Agreed.</p> <p>Suggestions are welcome.</p> <p>Agreed, but it should be borne in mind that Copyright provisions form the basis for the protection of inter-related rights contained in the PPAB.</p> <p>There is a reason for not allowing certain rights to be waived. Rampant exploitation must be stopped.</p> <p>Noted.</p> <p>Will consider.</p> <p>Not everything should be left for</p>

		<p>Bargaining for legal certainty.</p> <ul style="list-style-type: none"> Proposed the use of the UK model for remuneration. Proposed that we look at UK TV contracts for actors. 	<p>Collective Bargaining as not all performers choose this.</p> <p>Benchmarks should go beyond one country and the best is recommended.</p>
5	M-Net and Multichoice	<ul style="list-style-type: none"> The Broadcasting industry is one of the major funders of performers. South African broadcasters must address all contributors in the process whilst increasing volume etc. M-Net and MultiChoice support, develop and invest in performers in ways not contemplated or addressed in the Bill. South Africa is not a contracting party to the Beijing Treaty and has not signed or ratified it. This seems premature. No cost-benefit analysis has been done on BTAP. We also propose that the Bill be amended to provide that it will come into force 24 months (or longer) after it is signed by the President, to allow stakeholders sufficient time to prepare for its implementation. 	<p>Noted.</p> <p>Agreed.</p> <p>M-Net and MultiChoice should align themselves with the policy of Government.</p> <p>The PPAB should have provisions aligned to BTAP and ratification should follow later. Provisions of international treaties are required to be included in domestic legislation aligned with the policy objectives. The Beijing Treaty with several other WIPO treaties have all be considered and analysed.</p> <p>Cost-Benefit analysis was done in WCT, WPPT and BTAP is just an extension for performers - moral rights of performers to be commercially recognised.</p> <p>Noted.</p>

		<ul style="list-style-type: none"> • We commend the drafters' decision to remove the performers' protection provisions from the draft Copyright Amendment Bill, 2015 and address them in PPAB. • The definition of broadcast should be aligned in both the CAB and the PPAB. • The Bill contains a number of provisions which seek to interfere with the freedom which broadcasters, producers and performers currently enjoy to contract with each other. • Concerns with the following definitions-audiovisual fixation, broadcasting, communication to the public of a performance, performer, phonogram and reproduction. • Concern over the duration of the moral rights given to performers. • Resolution of disputes- These provisions are impractical and lend themselves to protracted negotiations and delays. • We support, in principle, measures to 	<p>It was the proposal of the stakeholders to separate the Bills as the principal Acts (Copyright Act/Performers Protection Act) are separate, unlike the IPLAA 38 of 1997 that amended IP laws in one Act.</p> <p>Agreed.</p> <p>This is a deliberate intervention in order to provide a balanced approach. Exploitation has to be addressed and laws strengthened and updated in line with best practice.</p> <p>Will be reconsidered to be in line with BTAP, WCT and WPPT.</p> <p>This is in line with BTAP and it is deliberate.</p> <p>At least the copyright regime is providing for ADR and the Tribunal will be the court of first instance to the High Courts, Supreme Court of Appeal and the Constitutional Court.</p> <p>Not agreed.</p>

		<p>protect performers from abuse. However, the Bill's approach, in the proposed s 5(1A) to 5(1D) of the Act in particular, excessively interferes with the parties' freedom to contract.</p> <ul style="list-style-type: none"> • We also propose that performer's rights in respect of the broadcasting and communication to the public of performances fixed in audiovisual fixations be reframed as a right to equitable remuneration, rather than a right of authorisation. • We recognise that the exceptions in respect of technological protection measures contained in s28P of the Copyright Act originate in the European Copyright Directive-concern on the drafting. • Not opposed to the referencing of "copyright sections" in sections 8A and 8B but have grave concerns with contents of section 28P. Proposed section 28P in the CAB reduces protection against piracy and render access control technologies vulnerable to hacking. Proposed that section 28P of the CAB be reformulated and definition of TPM circumvention device be made clearer. • An effective and actively enforced copyright regime is important against 	<p>Noted.</p> <p>Noted.</p> <p>Noted, will be considered.</p> <p>Agreed.</p>

Suggested wording for section 3A provided. • Current provision in section 5(2) of the principal Act should be retained as is. • With regard to TPM's, concern is that section 28P of the CAB is too widely 	<p>Noted and can be considered.</p> <p>Noted, to be considered.</p> <p>Disagree.</p> <p>The aim is to allow the performer to be consulted in his/her work. This will create considerable confusion, resulting in legal uncertainty. • We welcome the idea behind Section 3A, and to avoid any doubt and to better reflect the way the industry works, we suggest that the words “copyright owner” are replaced with “producer”. • Further, the drafting of the provision is not abundantly clear and appears to subject the vesting of rights to unnecessary and potentially burdensome formalities. • Clarity needed about the relationship between performers’ rights and copyright in copyright works containing performances. • Sections 5(2) and (4), as to be amended by clause 4 of the PPAB, create “hold-back” provisions that will result in interfering in contractual agreements and therefore undermine investments in the works embodying performances. • Clause 4 - sets out a long and 	<p>Noted.</p> <p>Noted.</p> <p>Noted.</p> <p>Noted.</p> <p>Noted.</p>

This objective could be achieved through an appropriate amendment of section 5(1)(b) to clearly state that performers whose performances are featured on a phonogram or audiovisual fixation shall have the right to receive royalties for reproduction, communication to the public, retail of sound recording, rental. • The amount of royalty concerned should ideally be determined by 	<p>Noted.</p> <p>Noted.</p> <p>Noted.</p>

It is <u>recommended</u> that the entire issue of the moral and economic rights to be afforded to performers be reconsidered with a view to the introduction of a legal model that would be fair and equitable but also feasible and properly aligned with the existing legal dispensation. • In terms of the moral rights section in the PPAB, it is not clear why a performer would, in terms of subsection 3(2), only enjoy the right to be identified as the performer, and the right to object to distortions and 	<p>Noted definition can be considered.</p> <p>The BTAP is a good treaty that empowers performers and such recognition must be accepted within industry.</p> <p>Noted.</p>
